Notwithstanding the tempestuous weather, however, our troops have made considerable progress. "Beaurains, Mercatel, Bolry-Becquerelle, Boyelles, St. Leger, Vaulx-Vraucourt, Beugny, 'Haplin-court and Barastre, Bus, Lechelle, Etricourt, Moislains, Peronne, Doingt, St. Christ, Voyennes and Canizy, to the neighborhood of Ham on the eastward bend of the Somme, "Our cavairy and infantry patrols are everywhere active east of this still very heavy.

"Our cavalry and infantry patrols are everywhere active east of this line. We hold the line of the Somme in strength from Peronne southward to Canizy. Our reconnaissance patrols are active as far east as Mons-en-Chausse. In several sectors between Bapaume and Arras our cavalry maintained their touch with the enemy all day yesterday. There was a good deal of skirmishing, but no heavy fighting."

THE FRENCH REPORT.

[BY ATLANTIC CABLE AND A F.]

PARIS, March 20, 10:30 a.m.—
The War Office announces that the French are still maintaining contact with the Germans along the section of the front over which the retirement is taking place, but that the advance has become more difficult by reason of the destruction of all means of communication and on account of bad weather.

German attacks at Avecourt wood and Hill 304 on the Verdun front were repulsed. Serious loss was inflicted on the Germans.

The statement follows:
"There was little change last night between the Avre and the Aisne. Our advanced forces made slight progress and still are in contact with the enemy. The advance has become more difficult because of the destruction of all means of communication, coupled with the bad weather.
"In the Champagne district the

the destruction of all leasans communication, coupled with the bad weather.

"In the Champagne district the artillery fighting reported yesterday came to an end last night. There has been no infantry activity.

"On the left bank of the Meuse, German troops have delivered several fresh attacks upon our positions between Avocourt wood and Hill 304. Each time the enemy were driven back. In Alsace there have been encounters between patrols in Carspach wood in which we took some prisoners.

"Yesterday two German airplanes fell within our lines as a result of aerial engagements. Another German machine, subjected to machine gun fire by one of our airpliots on March 16, was found yesterday near Noyon. It also has been confirmed that on March 16 our special anti-aircraft guns brought down a German airplane in the region of Manheulles."

—The nine-day battle on the Macedonian front has been without success for the French, according to today's army headquarters report. The statement reads:

"Eastern front: In some sectors the fighting activity was livelier than on preceding days. Raids on the Beresina and the Stokhod by reconnoitering detachments resulted in twenty-five Russians being brought in as prisoners.

"Macedonian front: The struggle that has been going on for the last nine days between Lakes Ochrida and Presba, as well as on the heights north of the Monastir basin, was equally unsuccessful for the French yesterday. North of Lake Doiran several British companies were dispersed by artillery fire."

advertisements never carry any price marks for the reason that our prices are so much lower than anyone else's prices that it would be poor policy to let other stores know what practically our entire stock is marked. Quite frequently you may find here exact duplicates of style garments marked one-half the price that the very same thing is marked elsewhere. Illustrations are simply to give the reader an idea what class of style merchandise this organization carries. The illustration cannot possibly show the quality of the material or the fit after it is put on by yourself, nor do the little touches show, such as fine dressmaking or tailoring, etc.

CANNOT WORK OR PLAY

When you are run down in health so that it impairs the efficiency of your work as well as your power to enjoy the pleasures of life it is time that you gave Dr. Williams' Pink Pills a trial.

The condition that doctors describe it at all is outside of the experience of most physicians until the blood has become so impoverished that it can be called anemia. Unless this condition of bloodlessness has been reached you simply complain of failing energy, loss of appetite, constipation, lack of ambition and animation. If you are well-to-do your physician will probably advise a change of climate. If not, he will tell you there is wothing much the matter with you. He means that there is no organic trouble.

But the blood is thin and the whole system lacks tone. The blood goes everywhere, practically, and improving the quality of the blood by using Dr. Williams' Pink Pills, tones up the whole body, improves the appetite, quickens the step and puts a new punch in life generally. We are compelled to take it to carry out a military plan to meet the big offensive the Entente had planned. We have destroyed nothing except out of military necessity. We have saved everything we could. We had to make a battlefield out of the territory we were giving up, for in it fighting will not take place and we could leave nothing in the hands of the enemy. It has been hard, too, for the French opulation, but that is the fault of their government. All the men of military age we took back with us. The remainder we have turned over to their countrymen and they now are in French hands. Now we will be accused again of barbarism, but we are fighting for our existence. That the final date of adjournment for the Legislature may be April 27 was indicated today in a report of the Assembly Committee on Rules.

After an inter-county altercation, which led the Surveyor-General to appeal to the Legislature for a decision, San Bernardino and Kern counties have adjusted their boundary differences, and the Harris bill, maintaining the present line, passed the lower house without opposition. A two-mile strip on the eastern edge of Kern county, containing the towns of Randsburg and Johannesburg and the Yellow Aster mine, was recently claimed by San Bernardino. Discovery that \$40,000 worth of road work in the strip would have to be paid for by the successful contestant was a factor which influenced San Bernardino to waive her claim, Harris said.

Virubava, lady in waiting to the Empress, and Alexandra's best friend, who had introduced Rasputin to the Empress.

Marie Feedorovna saw Alexandra only when court functions required. Since early in January she had been at Kiev and had refused to come to the capital. The meeting with Nicholas was said to have been very affecting. The object of her visit was to advise with him as to her future residence. It is reported she intends to go to Denmark, her native country.

MR. HUGHES'S REMARKS.
In opening the meeting Mr.
Hughes said:
"There is a principle involved in the attacks that have been made, and the success of that principle, I do not think it is too much to say, threatens the integrity of our country. If that principle is successfully maintained, the question is not simply of 'commercial rights. I regard these attacks, the method of their conduct, as an onslaught on liberty and on civilization itself. It is time the American people understood it. All organizations exercising public influence should record their convictions."

Mass Meeting of Little Street Vendors Protests Against Lyon Bill.

THE little news merchants of the streets, well reinforced by numerous mothers, gathered in at Berean Hall, Temple Auditorium Building, last night, after their rush hours were over, and made vigorous and emphatic protest against the proposed legislation that would deprive them of their right to sell papers.

prive them of their right to sell papers.

There was no mistaking the temper of the meeting. Each lad present, and the hall was well filled, understood that certain officious persons are trying to shut him off from the resources that have helped him to clothe and feed himself, and in many instances to help take care of his mother or little brothers and sisters. The manliness of these little fellows was appealing as, when questioned, one after another told of how he was appealing as, when questioned, one after another told of how he was helping to take care of the family, or providing for schooling, or creating a bank account. Some of these statements were so pathett in their sincere earnestness and lack of self-consciousness while portraying self-denial and perseverance that, as one of the speakers put it. "I had to swallow tears when I heard those boys talk."

The meeting was a red-blooded protest against the Senate Bill No. 101, introduced by Senator Lyon proposing to prohibit boys under 14 from selling papers on the streets, except under certain discriminatory provisions that are incompatible with the generally accepted idea that parents are supposed to know what is best for their own children to do. "Don't rob my boy of his chance," was the terse expression of one mother, in a letter sent to be read to the assemblage. This sentiment was expressed in other words in various letters from mothers that were read, and in the speeches that were read.

At the close of the meeting a resolution of protest was read and every person in the hall rose in a vote adopting it, while there was wild cheering for the movement in opposition to the proposed legislation.

Dr. Glen MacWilliams was the principal speaker. He read the bill and commented upon it, section by section. Very frequently his criticisms of it were interrupted by tumultuous applause. The boys grasped the significance of the measure that, to a large extent, would drive them

Chief Engineer Scattergood was sked to give an explanation. He lated he had given instructions that rees were not to be cut down or sutilated except when absolutely ebassary, but that did not seem to slive the situation. The commission passed a motion, made by Comission passed a motion, made by Comission passed a motion, made by Comission of the owner of the property is interviewed. Mr. Scattergood was iso instructed to have before the ommission at its next meeting the nen who cut down the live oaks.

"In this case," Right of Way spent Martin told the board, "the saintant engineer issued orders, at my request, not to have the trees ut, and these orders were ignored." The \$500 claim was made by J. Freeman Cook. Miss Alma May look, his daughter, appeared before the commission with photographs, thowing the vandalism that had even committed by power department men. She stated that because of the great beauty of these live cass, the lots had been purchased as a site for the Cooks' permanent residence, but although she had hurried to the lots in a commissioned residence, but although she had hurried to the tots in a commissioned auto track as soon as she learned by telephone of the onslaught, she was too lats to save the trees.

"If I had gotten there in time," stringly remarked Miss Cook, "those men would never have cut down our trees, that we have so highly prized for ten years."

THE BLESSED RED CROSS. The Red Cross is known in nearly ever aed country, and its usefulness and sity are widely recognized. It is not aized to promote war, but to ameliorate ardships and suffering. Its members are the merciful who stand by on the battle-

fields and march; they serve on the spot, and all of their work is good. None of it is bad; The organization is certain of the cordial support of the friends of our soldiers if these friends would do the utmost in their power toward ameliorating the sufferings and

toward ameliorating the sufferings and necessities of the defenders of the country. Less than ready and generous support to the Red Cross—local and national—is unworthy of the best efforts of patriotic people.

Its workers are ever on merciful missions bent; always on duty—duty as important, in many cases, as that of soldiers themselves in the face of the enemy. They are the soldiers of the blest.

Now and then, but happily not often, we Now and then, but happing not often, we encounter persons—too often women—who lack the intelligence to know what the Red Cross organization really is; persons so stupid, so lacking in common intelligence and familiar every day knowledge as to suppose that the Red Cross is an agency for the promotion of war, instead of what it is, a

promerful agency for the amelioration of the suffering caused by war.

The movement in Los Angeles, headed by good women and backed by patriots and vet-eran soldiers, for the reorganization of the eran soldiers, for the reorganization of the Red Cross, and for increasing its member-ship to a formidable aggregate, is one of the very highest merit, which will yet develop-into a movement of the most urgent neces-sity in case of war between Germany and the United States, or between our country and any other foreign country, or in the event of domestic insurrection or rebellion. Tos Angeles and her good men and women may well be inspired by a lofty ambition to increase the membership of the Red Cross within the city's limits to an aggregate number greater than that shown by any city of like population between the two seas.

Every consideration of particular relief to our soldiers in the field who may and will deserve so much at our hands if war comes, is in favor of the prompt rehabilitation and powerful strengthening of the Red Cross.

BRAINS, NOT BRAWN. BRAINS, NOT BRAWN.

The smallest man in the United States army stands sixty and one-half inches in height. For all that, this little man may become the strong arm of the War Department. The greatest battles are fought and won with brains, not brawn. A tiny stone, directed by the brain of a shepherd boy, felled the chief of the Phillistines.

G RAND OLD BISHOPS.

The Methodists in New Jersey have ordered American flags to be affixed to the steeples of all their meeting houses in that State. One is reminded of the days when the Methodist Episcopal bishop, Simpson, was one of the most powerful forces in the country for the Union, and when that grand old patriot Catholic, Archbishop Hughes of New York, marshaled his followers for the

BEASTS, THAT'S ALD.

There is a great lesson for us all in the death of Bonavita, the famous animal trained who was killed by a polar bear that he was exercising. It is a mistake to make pets of wild beasts, but it is just as foolish to coddle and caress the young lions of passion, the wolves of avarice, the hyenas of enry and the tigers of hatred. There comes a time when the beast of the forest and the beast of the soul forgets that it is a pet and, considering only its own wavage nature and its just for blood, turns and destroys the one who fondled and fed it.

SOUNDS GOOD.

T SOUNDS GOOD.

Oregon convicts are to be given military training. There can be nothing wrong in this move. Society's problem has ever been to put people and things where they belong. Many a man who is unhappy in other walks of life would make an exemplary soldier. It may be that some men are born with a leve for activity and adventure, and, falling to find legitimate expression, more easily fall into crime. Like Chapman, the pirate prisoner, many of the world's "bad men" become the world's best men when they discover their place in the social body.

Was it a bell hop, a chambermaid in such of salvation, or an ordinary hotel seak thief that took advantage of Mr. F. W. ronin's trip to San Diego to lift his Bible om his room at the Angelus? A Montana title and mining king needs his Bible herever he may be; and, owing to the proxity of San Diego to Tis Juana he needs it ore, aye, much more in the city of "Baynmate" than he does in God-fearing Los ageles. Mr. Cronin was not well advised he would have taken his Bible with him the trip and carried it where the average options man carries his pack of cards—in tana man carries his pack of cards nner vest pocket next his heart,

The times in which we live are moving rapidly (in some instances backward,) but in the main the movement is a forward one. Russia's system is not the only despotism in a fair way to be banished from the earth. Every country is in the main radical in its tendencies and has been so since the beginning of the present century.

We, the freest people on earth, ought to have moved far enough forward to have got beyond the reach of the present radical upheaval which tends towards the sweeping of all old things out of existence. Yet we have not moved so far forward as to have another has been swept away and conserva-tives are decidedly out of fashion in the present epoch in our land. It must have startled many of us when the United States Senate, the other day, threw "Senatorial courtesy" into the scrap heap and made it impossible hereafter for any little clique to bar legislation in that august body. The United States Supreme Court has been as the remaining bulwark against the onward sweep of this tide of radical thought. Now that seems to have gone with all the other safe-

guards of conservatism.

The finding of the Adamson Act to be agreeable to the Constitution of the United States shocked many of us, however accustomed we have become to the prevalence of radical thought in our times. It is perfectly safe to say that ten years ago no such decision could have been wrung from the highest court in the land. The Democratic party, that once stood for hidebound conservatism, and which, sixty years ago, dubbed in derision the newly-formed Republican party as "radicals," "red Republicans," has now become the most radical party in the country. The party has been eaten into for a generation past by Socialism, and now the party of Andrew Jackson, Thomas H. Benton and Grover Cleveland has become revolutionary. The Supreme Court has been invaded by this radicalism, particularly since the election of Woodrow Wilson to the Presidency and his inauguration more than four

But Americans are game, and are not i people to sit down like little children and cry over spilled milk. It is a will of the ma-jority, and that will always is the supreme sal suffrage so nearly a fact as it is in America. It has been an axiom among thoughtful people for many years that, after all, in the last count, constitutions were only "mere scraps of paper" that could not stand for a minute in the face of an overwhelming demand, on the part of a large majority of the people, for any measure pending before the country. In such a country as ours, every-thing, even the decision of courts, in the final

No matter what we expected, the unexpected has come to pass in this decision of the Supreme Court upholding the Adamson Act, wrung from Congress under the threat of political proscription, and from the President himself, driven by the lash of Gompera and his representatives. All bulldozed into line! It is a staggering demonstration.

Yet the affair may not be as bad as it seems. There is no doubt the bill was put through under a gross subterfuge, the claim being that its purpose is to grant the train men an eight-hour day, and this humani-tarian feature of the bill appealed powerfully to the people generally. That was the last thing the trainmen wanted; what they were after was a bigger slice of the gross profit earned by the railroads. They would have been the most disappointed people on earth if the humanitarian feature had been made effective. They got what they wantedmore pay-and avoided what they did not want-less hours of service.

Where the possible comfort comes in for the people is that the law makes arbi-tration a fixed principle in the United States in settling disputes between organized labor and capital. (Free, independent labor is law-abiding.) The train men have foreseen this, and were not at all satisfied with the Adamson Act as it passed Congress. This decision of the Supreme Court will add very much to their uneasiness and discomfort. Of course it puts the decision of all disputes between labor and capital in the hands of Congress whenever that body may be ap-pealed to. And what can't Gompers and his bunch do with Congress?

But despite all misgivings, we can fall back upon the good sense of the majority of the American people, who in the end wil learn the truth by experience, if not by abstract reasoning, and in the last resort will discover the evils of unjust and unconstitutional legislation, even if enacted by a sub-servient Congress under the pretense o necessity, and sustained by a complaisant upreme Court under the doubtful plea of

WHAT IS TREASON?

It is not necessary that one should be a citizen of the United States in order to commit treason against it. "An allen who is domiciled within a country owes tempo rary allegiance to the government which is co-extensive with his residence under the s. U. S., 16 Wall. 147.)

For an alien, while such duty exists, not to observe its requirements is treason. (13 How. St. Trial, 227.)

The United States Constitution provides that "treason against the United States shall consist only in levying war against them, or in adhering to their enemies. giv-ing them aid and comfort."

Treason is composed of two elementsthe intention, which is an act of the mind, and the overt act, which is its physical cor relative or counterpart. "The intention with which letters are written is the crite rion for ascertaining whether the writing is an act of treason." (6 T. R. 527.)

When war exists, aid and comfort are given to the enemy by any act of a citizen or resident alien which clearly indicates a want of loyalty to the government and sym pathy with its enemies. Aid and comfort are given by the communication of advice to the enemies of the government, thereby furnishing them with valuable informati as to their future actions or conduct. To advance money or obtain credits for the use and support of a hostile army is treasonable. The communication of intelligence to the enemy by letter, telegraph or otherwise, relating to the strength, moven or position of the army or navy is an act of treason. (Bond, U. S. 609.) Even though the letters containing the information are intercepted. (U. S. vs. Mitchell, 2 Dall. 357.) Misprision of treason occurs where one

Blessed are the Merciful.

ted does not, as soon as possible, impart such information to the President of the United States or a United States judge or the Governor of the State or a State judge or justice. (Rev. Stat. U. S., Sec. 5333.) Treason is punishable with death or, at the discretion of the court, imprisonment at hard labor for not less than five years

and a fine of not less than \$10,000. The Times could wish that to the other penalties for treason or misprision of trea-son were added that of deportation or transportation beyond seas. If a batch of hy-phenated aliens—naturalized or unnaturalzed-who are, to the extent of their oppor unities and abilities, aiding Germany in the war which now exists between that power and the United States, could be conveyed Islands, where the fishing is good and wheat and potatoes would grow, nobody would object; or they might be placed on an in-terned German ship and started for a Belrian port and then, if a German submarine should torpedo and sink the vessel and its assengers, there would be less occasion

THE ADAMSON LAW DECISION IL-

Chief Justice White subordinated his isually clear and comprehensive mind to the supposed necessity of packing water on both houlders, and the result is a decision in the Adamson law case that is confusing, not to say muddling, to any intellect unaccus s truth to slip out, as, for instance, when he says that the Adamson law makes the standard of wages and hours of labor which it prescribes "obligatory on the railroads but nal on the employees," and again when he says of the dispute between the railway companies and the train hands: "We are of the opinion that both are right and in a sense both are wrong." Again the Chief Justice mixes a truth with his errors when he says that "the situation was one of emergency, and that emergency cannot be made the source of power." Yet he makes the emergency of a threatened strike the source of the power which Congress exercised in en-

The situation is not unlike that which existed many years ago in this State when its Supreme Court said that "courts should take judicial cognizance of the social condition of the people they judicially rule." This was for the action of the court in the Archie case in which it was decided that a young southern gentleman, by voluntarily bringing his slave into the free State of California, thereby emancipated him; but, the Cou added, the young man was sick and needed the services of his slave, and the court therefore, on the hearing of the habeas cor pus, brought by friends of Archie, discharged the writ and remanded the colored boy to the custody of his owner. This decision of the court was characterized by the legal wits of the day as "giving the law to the North and the nigger to the South."

It is undoubtedly true that in cases before appellate tribunals the effect of the decision upon the public interests, as well as upon the absolute rights of the litigants, is often given grave consideration, and that courts sometimes heed the plea that Bassanio made to Portia, that "to do a great right, do a

The Times can do no less than criticis the five members of the Supreme Court who rendered the illogical decision, for they sus-tained by the narrowest possible margin the timid and truckling surrender of Congress to the labor unions made when capitulation was neither right nor necessary. The \$100,000,000 per annum that it will cost the people who travel and the people who will pay an in-creased price for commodities transported by rail is probably not an excessive price to pay for avoiding the indescribable loss and suffering that would result from a general railroad strike at this time. But yielding to threats from organized labor despots is un-pardonable in a free government. Still the situation possibly has its ameliorations, as pointed out in the able dissenting opinion of der the doctrine announced in the decision Congress has power "to fix a maximum as well as a minimum wage for trainmen, to require compulsory arbitration of labor disputes which may seriously and directly jeop-ardize the movement of interstate traffic, and to take measures effectively to protect the free flow of such commerce against any combination, whether of operatives, owners o

It is not likely that the Sixty-fifth Congress will extend the Adamson law to all railroad employees, and it is not impossible that with the restoration of peace in Europe and the termination of our dispute with Ger-many, the law will be repealed, and the question of wages be left where it belongsmatter of private contract between employer and employee, with which a Gompers-dic tated Congress has no right to interfere Certainly the workers in factories, and fur naces, and forges, and fields will not com placently accept permanently Congressional action raising the wages of 4 per cent. of their number by a measure one indirect re-sult of which will be to increase the cost of living of the other 96 per cent.

BANISH THE HYPHEN.
There are German-Americans and Irish-Americans and Spanish-Americans and Italof a Holland-American? When the Dutchman comes to this country to stay, he becomes an American without a hyphen. He brings with him an ingrained disposition to obey the laws of his new country and a willingness to fight for it.

The demand of the hour is that hyphenating shall disappear and that foreign-born people who enjoy the protection afforded by gious liberty, and the opportunities which our land offers to intelligent industry, shall cease to be aught else and shall become Americans from foundation to turret or, as an enthusiastic sea captain expressed it, "from stem to stern."

WHEN A MAN IS MOST EFFICIENT. In the April American Magazine Dean

Herman Schneider says:
"A man is most efficient when he is doing "A man is most efficient when he is doing the work that gives him the greatest satisfaction. From the laborer to the business executive, every man should get three things out of work; a decent living, development and discipline, and satisfaction in the doing. "If your job gives these to you, give back to it the best work of your hand and brain. If it falls to give you these, face the fact that you are a misfit, and seek your appointed place. You have no right to let life remain separated from its two handmaids—liberty and the pursuit of happiness."

It was with awe and reverence that I went to Sacramento to watch the working of our proud, wise Legislature to which we had intrusted the fate of California. I had pictured an atmosphere of calm, intense studiousness, of judicial deliberation, of solemn responsibility. I looked for a company of serious, dignified men, whose best thought was dedicated to our service. Every one of them with six ounces ery one of them with six ounces more brain than myself, every one of them exalted with the sense of lofty duty and high office. I went

RUSH LEGISLATION.

BY ALMA WHITAKER.

It was with awe and reverence

Vast legislative measures with farreaching portent are popped in one end by the hundred; the handle is turned with merry abandon and breathless celerity, and the results come out the other end in one long continuous row of link laws like dear little pork sausages, not necessarily guaranteed by the makers. I had heard a good deal about "pork," to the confusion of my inferior feminine intellect—couldn't understand what it could possibly have to do with legislation. But now I understand Every law that have to do with legislation. But now I understand. Every law that now I understand. Every law that is passed for our keeping is a chubby pork sausage, with fearsome ingredients, about which we are very wise not to inquire into too deeply. Some sausages may be better than others, but it is the sheerest luck if we get any good sausages. For we have 120 official legislative sausage-makers, eighty Assemblymen and forty Senators, the bulk of them light-hearted amateurs firmly convinced that any ingredients are good enough for sausage. And who would dream of making sausages individually? Naturally ents are good enough for sausage.

And who would dream of making sausages individually? Naturally they are turned out by the mile for the guileless consumption of the masses. And no questions asked. They have got sausage making down to an efficient simplicity at Sacramento. A few thousand measures are introduced—sponsored by precoclous babes, bald-headed bucolics, or amateur Lucifers. A few dozen are popped into a committee of, say, eleven selected Assemblymen, who immediately have letter paper printed at the State expense, setting forth the committees upon which they have been appointed.

After a day of automatic "ayes" and "nos" in the assembly hall, they are a little stodgy. They meet at 7:30 p.m. in a stuffy little committee room at the Capitol, ostensibly to hear the arguments for the meas-

tee room at the Capitol, ostensibly to hear the arguments for the meanures on either side, which means that the little room is crowded with a smoking, chewing assembly of tired martyrs. And they will deal with a dozen measures at a sitting between 7:30 p.m. and early morning, when they are all so sleepy and cross and peevish and their poor inadequate heads must be a maze of confusion. For they have probably listened to a batch of arguments on workmen's compensation, ments on workmen's compensation community property amendments community property amendments, apartment-house laws, divorce reforms, eugenic innovations, birth-control acts, child labor, fish and game measures and State markets, to say nothing of prohibition, vice segregation, trading stamps and prison reform. Oh, yes, and the women's jury bill, and care of the feeble-minded.

women's jury bill, and care of the feeble-minded.

They are given an interval in which to sort out their impressions, and then they meet again to decide which of these measures shall be recommended for passing, which for debate on the floor of the House, and which to throw out. In my innocence I should have imagined that any one of those measures would have called for at least a couple of years constant study and deliberation. But that's all I know about it. Our legislators probably have 3000 measures of imperative urge before them and deliberation is a luxury. So they are slicked through committee and popped into the Assembly. Here the committee's recommendations are gabled dations are gabbled through by the clerk of the court and a roll call is cried. "By Crombie Allen," calls the

And Crombie, who is known as the administration bell signal, in that his "aye" or "no" is the indi-cator for the faithful administration disciples to unerringly follow, really decides the fate of that measure. whichever way Cromble voted, is the majority way. Cromble does not have to think how he will vote, he has his orders. And wouldn't the faithful have been foolish to waste time thinking how they would vote, since, had they not fol-lowed Cromble, their fats, too. would vote, since, had they not fol-lowed Crombie, their fate, too, would have been sealed. Of course, when a particular legislator is being uncomfortably watched by his dis-trict in regard to a certain measure, he may receive temporary absolution, but a majority is always carefully arranged, according to the admin-istration's immediate requirements.

The same procedure is followed via the Senate committees and in the Senate chamber. They just deal with the measures in batches and dispose of them with lightning swiftness, expending the least possible amount of thought.

Those interminable roll calls in the Assembly and the Senate, when legislators automatically cry their "aye" or "no" are the formula by which we are hoodwinked. Actually we are legislated for by a mysterious bureaucracy, which may or may not be more fitted to decide the laws under which we shall live, than the legislators who obey their bidding. And this is how the laws are passed for our guidance. Now bidding. And this is how the laws are passed for our guidance. Now and again, we are assured there is to be a "good fight" over a certain measure. We flock to the chosen hall of debate with feverish excitement. Here one or two legislators will hop up and gurgle a few remarks which they fondly regard as virulent logical argument. Sometimes they wax mildly facetious at each other's expense. But very few legislators really listen. Conversation goes on in monotone all

the time; letters are dictated in a droning whisper to chirpy little stenographers who sit with their patrons; the Speaker raps frequently for decorum, and by and by the roll call is cried again and the thing is passed in or out of law.

It is all so delightfully inconsequential. We just know that it matters very little whether the law is made or marred. The chances are it won't be enforced very drastically either way. A few of us may be sadly inconvenienced by it, but the rest of us probably won't know or care a thing about it. If it is something that we really take an interest in, we shall have to pay for our attention with a special reffor our attention with a special re-erendum, which is always profitable to legislators and their hangers-or and relieves them of the responsibil ity of thinking when

ity of thinking when thinking seemed necessary.

From this session we shall probably acquire some 3000 legislative sausages of such doubtful ingredients. We shall have paid for them, so what does it matter if most of them have to be consigned to the legislative garbane can as time seem

our little home tastefully and at small cost?"

If you can save out 18 or 20 cents from the general household expenses each week it will soon mount up to three or four dollars, as the case may be. This may be spent for carpets, wall paper, varnish and curtains. Other incidental expenses will eat up the rest of it. In selecting the wall paper pick out large patterns that you will soon tire of. The larger and more horrible patterns are the most expensive, but they can always be covered over with something simpler if you so desire. The choice of wall paper is important became it can seldom be sent back if it doesn't fit. Another simple way to redecorate the home is to invite a small cousin or nephew for a visit and give him several buckets of paint and a hatchet to play with.

hits that spelled defeat to the college team.

Harry Krause, an old Phoenix player, was allowed to play against his alma mater in center field, and it was his willow that decided the game. In the first inning, with two down, he hit a home run to deep center. The Phoenix tied up the acore in the second when Moy tripled and scored on Kelly's infield hit. Whelan, pitching for St. Mary's, is immed up the bases in the fifth and then fed another fat one to the same krause, who pounded out another four-macker, clearing the paths. SETBACK IN WHEAT, BUT CORN TOUCHES RECORD.

HICAGO, March 21.—Profit taking sales overcame all advances in the wheat market today. There appeared to be virtually unlimited quantities awaiting purchases above d. 1.88 for May. The result was an unsettled close. 1/6 1% net lower, with May at 1.85% \$\infty\$ 61% net lower, with May at 1.85% \$\infty\$ 1.86%, and July at 1.67% \$\infty\$ 61.67%. Corn finished unchanged to 4/6 % higher; oats % off to 6/6 up, and provisions at a rise of 5/6 15. War preparations by the United States tended to encourage the bulls, and so likewise did administration efforts to counteract dangers to American shipping. Despite numerous sharp railies the wheat market leaned more and more toward a lower level in the last half of the session. Scarcity of rural offerings sent corn to the highest level of reacord, No. 2 fellow and No. 3 white selling at 1.13%. Oats showed much independent strength, especially the May options. All deliveries of provisions advanced to new high levels.

WHEAT PRODUCTION IN

SOUTHERN HEMISPHERE

(BY A. P. DAY WIRE.)

WASHINOTON, March 20.—Production of wheat in Argentina, Australia and New Zealand, the principal production for the 1918-1917 season, but is only 7.7 per cent. less than the five-year average. A cablegram from the International Institute of Agriculture at Rome, received today at the Department of Agriculture, announces the production of those countries as 226,274,000 bushels.

Spain's wheat acreage, sown last autumn for this year's harvest, is 10,134,000 acres, or 3 per cent. more than last year, and Japan's acreage is 1,230,000, or 4 of 1 per cent. less than ilast year's areage. Spain's 1016 corn prodution is given as 28,642,000 bushels, or 1.6 per ent. less than the previous year's crop. That included with the production of the United States, Canada, Italy, European Russia, Switzerland, Japan and Egypt, makes a total of 2,841,514,600 bushels, or 13.4 per cent. less than the previous year. British India's rice production shows an increase of 3.7 per cent. over 1915, and 19.1 per cent. more than the five-year average, with 117.659,904,000 pounds. Spain's rice crop was 532,890,000 pounds, or a 'ncrease of 2.8 per cent. Production in those countries and the United States, Japan and Canada total 143,605,728,-000 pounds, an increase of 2.5 per cent. over 1916.

ten last February 12, sets forth that the railway has been caused no little annoyance by taxicab drivers charging to haul passengers from one station to another, when such passengers are supplied with coupons which call for free transportation.

Passengers from the East are supplied with such coupons. One of these passengers was Mrs. L. F. Boyd of No. 662 North Gold street, Pomona, who, the letter states, gave the coupon to a bus driver, "who took the coupon and told her 'All right; set in." He drove her to the Salt Lake station and, it is alleged, charged her \$1, telling her the coupon was of no service.

Mr. Selvy stated the driver of this bus was Mr. Erickson, and added in the letter:

"Can you help us in any way towards putting a stop to this kind of graft? I am told this kind of work was going on in Chicago and that the police took a hand in it and broke it up."

Mr. Erickson alleges the statements made in the letter are false and malicious and asks \$5000 actual and \$4000 punitive damages. He is represented by Attorneys Griffith Jones and E. T. Lucey.

Millinery for Matrons

We make a specialty of becoming millinery for the woman who does not want strictly youthful styles, nor those for elderly people; and never have we shown such a wide range of styles for this woman of indeterminate age; hats for all occasions, made with care, with thought of line. Beautiful hats of hair braids and maline, trimmed with jet, beaded ornaments, cabachons of braids, wings, burnt peacock, burnt goose or flowers, are here to choose from, at\$5 to \$50

Brand-new arrivals, in hats that are distinctly different in character from the ordinary motor cap or hat; made of soft pliable straw braids in delicately blended tones, trimmed with ribbon, cabachons

of braid or braided band effects. Mushroom turbans, with various widths of brimsstyles that pull down and fit snugly to the head-hats that protect from dust and sun. All are made with adjustable headsizes. One glance will convince you of the advantage of such practical hats over other styles\$2 to \$10.00
